DETAILED ACTION

The response filed **November 25, 2005** presents remarks and arguments to the office action mailed **May 20, 2005**. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Status of claims

Claims 35-90 are pending.

Claims 37-38, 46-47, 55, 65-66, 75-77 and 85-86 are amended.

Objection

The objection to the specification has been withdrawn as Applicant has filed a certificate of correction and is granted and entered.

Claim Rejections - 35 USC § 112-first

Claim 43-52, 55-62, 85-90 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant's arguments have been fully considered and persuasive.

The rejection is therefore withdrawn.

New Claim Rejections - 35 USC § 112-second

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 35-90 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

How is less frequently than daily defined? It is interpreted that less frequently than daily can mean once every other day, once a week, once every other month, once a year or a laundry list of other variation. How does one prevent administration of vitamin D via sunlight? A natural source of vitamin D. Does this mean that administration of vitamin D less frequently to any representative of females will induce apoptosis of non-neoplastic cells? What happens to a non-female representative that is administered vitamin D less than frequently that does not have ovarian non-neoplastic epithelium cells? Will the non-neoplastic cells die as well?

Claim Rejections - 35 USC § 112-first

With regards to Claim Rejections - 35 USC § 112 to claims 35-90 of prior office action the rejection is maintained, as stated in the office action, the instant claims does not reasonably provide enablement for a representative of vitamin D products to induce apoptosis in a large representation of females. The claim is very broad and include any female when given a representative of vitamin D will induce cell death-apoptosis in the non-neoplastic ovarian cells.

With regards to claims 43-90, the subject is not a female yet in the specification the only two examples are from a female with non-neoplastic ovarian epithelium cells, what happens to a male that does not have a non-neoplastic ovarian epithelium cells.

Double Patenting

The filing of the terminal disclaimer has been acknowledged by the examiner. The decision of the approval/disapproval is pending therefore the rejection will be maintained until the decision is made.

No claims allowed.
